

Grand Pavilion

The Melbourne Showground's Grand Pavilion, one of the largest tent structures in the Southern Hemisphere, has now become a landmark feature of Melbourne's skyline. The 8,000 square-metre Grand Pavilion, is a central feature of the newly redeveloped Melbourne Showgrounds.

The Grand Pavilion is about half the size of the playing surface of the MCG or the equivalent of 30 tennis courts. The flexibility of the Grand Pavilion and other surrounding venues at the Melbourne Showgrounds makes it an ideal venue for an array of events and activity, only limited by your imagination.

Structure

This iconic lightweight high tensile membrane structure suspending between six central masts, has base perimeter walls which are self supporting and consist of a lightweight modular cladding system supported by a steel frame. The building has sections of glazing throughout the facade from all elevations.

- 8000m², with 6 feature columns
- 2 tilt up roller doors for easy loading access
- Single phase and 3 phase power throughout building
- Two water and waste points within building
- Concrete floor
- Public address system
- Located directly off the main boulevard
- Large ceiling heights
